

January 2019

Dear Parents and Families of Alexander Adaire School,

I am writing to share information about an exciting investment happening in our school.

Our school will receive a \$2,424,000 boiler replacement. The more modern system will provide us with more efficient and reliable heat to ensure our building stays warm.

This is an exciting and welcome environmental upgrade for our school. The work will be carried out during the day by Pennulla Construction Company, Inc., PT Mechanical Group, LLC and Jack Cohen & Company, Inc. A Project Manager from the School District will be assigned to supervise the contractor to ensure minimal disruption to the school day.

I will notify you when the work is complete. For more information on our project visit our website at www.philasd.org/capitalprograms/programsservices/construction/capital-projects/.

Thank you for your patience, as we continue our mission to provide a safe learning environment for our children.

For questions, please send an e-mail to CapitalPrograms@philasd.org or call 215-400-4730.

Best,

Anna Jenkins
Principal, Alexander Adaire School
