

January 2019

Dear Parents and Families of Paul L. Dunbar School,

I am writing to share information about an exciting investment happening in our school.

Our school will receive a \$99,800 emergency generator replacement. The more modern system will provide us with safer, more efficient and reliable electricity, as well as a source of backup electricity in the event on an emergency.

This is an exciting and welcome safety upgrade for our school. The work will be carried out during the day by Paramount Electrical Service, LLC. A Project Manager from the School District will be assigned to supervise the contractor to ensure minimal disruption to the school day.

I will notify you when the work is complete. For more information on our project visit our website at www.philasd.org/capitalprograms/programsservices/construction/capital-projects/.

Thank you for your patience, as we continue our mission to provide a safe learning environment for our children.

For questions, please send an e-mail to CapitalPrograms@philasd.org or call 215-400-4730.

Best,

Dawn Moore
Principal, Paul L. Dunbar School
