

January 2019

Dear Parents and Families of Feltonville Intermediate School,

I am writing to share information about an exciting investment happening in our school.

Our school will receive \$768,975 renovations to our classrooms. The upgrades will make the classrooms more comfortable for our students and staff, and more efficient as a teaching environment. We will be able to replace the ceiling entirely, with upgrades to the lighting that include more energy-efficient bulbs and more comfortable lighting for our students.

This is an exciting and welcome safety upgrade for our school. The work will be carried out during the day by TE Construction, GEM Mechanical and Madden Electric. A Project Manager from the School District will be assigned to supervise the contractor to ensure minimal disruption to the school day.

I will notify you when the work is complete. For more information on our project visit our website at www.philasd.org/capitalprograms/programsservices/construction/capital-projects/.

Thank you for your patience, as we continue our mission to provide a safe learning environment for our children.

For questions, please send an e-mail to CapitalPrograms@philasd.org or call 215-400-4730.

Best,

Alonzo Fulton
Principal, Feltonville Intermediate School
