

March 2019

Dear Parents and Families of J. Hampton Moore School,

I am writing to share information about an exciting investment happening in our school.

Our school will receive a \$7,448,460 major renovation. The exterior upgrades include a new roof, new windows and a storm water management system. Some interior upgrades include 70" LED interactive panel displays in 28 classrooms and new visual display surfaces in classrooms and corridors.

The renovations will make the classrooms more comfortable for our students and staff, and more efficient as a teaching environment.

This is an exciting and welcome safety upgrade for our school. The exterior work will be carried out during the day by Smith Construction Company, Hyde Electric Company and Mobilease Corp. The interior work will be carried out during the day by TE Construction Company and Hyde Electric Company. A Project Manager from the School District will be assigned to supervise the contractors to ensure minimal disruption to the school day.

I will notify you when the work is complete. For more information on our project visit our website at [www.philasd.org/capitalprograms/programsservices/construction/capital-projects/](http://www.philasd.org/capitalprograms/programsservices/construction/capital-projects/).

Thank you for your patience, as we continue our mission to provide a safe learning environment for our children.

For questions, please send an e-mail to [CapitalPrograms@philasd.org](mailto:CapitalPrograms@philasd.org) or call 215-400-4730.

Best,

Tim Glynn  
Principal, J. Hampton Moore School
