

January 2019

Dear Parents and Families of Andrew J. Morrison School,

I am writing to share information about an exciting investment happening in our school.

Our school will receive a \$268,500 update to our fire alarm system. Our existing system will be replaced with a new modern system that will provide us with faster, more accurate information in the event of a fire.

This is an exciting and welcome safety upgrade for our school. The work will be carried out during the day by Hyde Electric Corporation. A Project Manager from the School District will be assigned to supervise the contractor to ensure minimal disruption to the school day.

I will notify you when the work is complete. For more information on our project visit our website at www.philasd.org/capitalprograms/programsservices/construction/capital-projects/.

Thank you for your patience, as we continue our mission to provide a safe learning environment for our children.

For questions, please send an e-mail to CapitalPrograms@philasd.org or call 215-400-4730.

Best,

Meredith Lowe
Principal, Andrew J. Morrison School
