

January 2019

Dear Parents and Families of Robert B. Pollock School,

I am writing to share information about an exciting investment happening in our school.

Our school will receive \$747,610 in site improvements that will repair the retaining wall on our property. This project includes the restructuring of our retaining wall around the school. Replacement of our current materials will increase safety for our students.

This is an exciting and welcome environmental upgrade for our school. The work will be carried out during the day by Murphy Quigley Company, Inc. A Project Manager from the School District will be assigned to supervise the contractor to ensure minimal disruption to the school day.

I will notify you when the work is complete. For more information on our project visit our website at [www.philasd.org/capitalprograms/programsservices/construction/capital-projects/](http://www.philasd.org/capitalprograms/programsservices/construction/capital-projects/).

Thank you for your patience, as we continue our mission to provide a safe learning environment for our children.

For questions, please send an e-mail to [CapitalPrograms@philasd.org](mailto:CapitalPrograms@philasd.org) or call 215-400-4730.

Best,

Dontae Wilson  
Principal, Robert B. Pollock School
