

March 2019

Dear Parents and Families of Solomon Solis-Cohen School,

I am writing to share information about an exciting investment happening in our school.

Our school will receive a \$52,438,193 major renovation. The upgrades include a new 2-story 141,140 square foot school with 64 classrooms, a gymnasium, cafeteria/auditorium and media center. This project is designed to achieve LEED Gold Certification and will feature new play areas for students to enjoy.

This is an exciting and welcome safety upgrade for our school. The work will be carried out during the day by Ernest Bock & Sons, Inc., PT Mechanical, Dolan Mechanical and McGoldrick Electric. A Project Manager from the School District will be assigned to supervise the contractor to ensure minimal disruption to the school day.

I will notify you when the work is complete. For more information on our project visit our website at www.philasd.org/capitalprograms/programsservices/construction/capital-projects/.

Thank you for your patience, as we continue our mission to provide a safe learning environment for our children.

For questions, please send an e-mail to CapitalPrograms@philasd.org or call 215-400-4730.

Best,

Dr. Michelina Serianni
Principal, Solomon Solis-Cohen School
