

January 2019

Dear Parents and Families of Thurgood Marshall School,

I am writing to share information about an exciting investment happening in our school.

Our school is receiving a \$872,000 roof replacement. This means a more well-insulated building for our students and school community to stay warm.

This is an exciting and welcome safety upgrade for our school. The work will be carried out during the day by Robert Ganter Contractors, Inc. A Project Manager from the School District will be assigned to supervise the contractor to ensure minimal disruption to the school day.

I will notify you when the work is complete. For more information on our project visit our website at www.philasd.org/capitalprograms/programsservices/construction/capital-projects/.

Thank you for your patience, as we continue our mission to provide a safe learning environment for our children.

For questions, please send an e-mail to CapitalPrograms@philasd.org or call 215-400-4730.

Best,

Keith Arrington
Principal, Thurgood Marshall School
