

January 2019

Dear Parents and Families of John H. Taggart School,

I am writing to share information about an exciting investment happening in our school.

Our school will receive a \$230,000 update to our fire alarm system. Our existing system will be replaced with a new modern system that will provide us with faster, more accurate information in the event of a fire.

This is an exciting and welcome safety upgrade for our school. The work will be carried out during the day by Cohen Electric & Company Inc. A Project Manager from the School District will be assigned to supervise the contractor to ensure minimal disruption to the school day.

I will notify you when the work is complete. For more information on our project visit our website at [www.philasd.org/capitalprograms/programsservices/construction/capital-projects/](http://www.philasd.org/capitalprograms/programsservices/construction/capital-projects/).

Thank you for your patience, as we continue our mission to provide a safe learning environment for our children.

For questions, please send an e-mail to [CapitalPrograms@philasd.org](mailto:CapitalPrograms@philasd.org) or call 215-400-4730.

Best,

Nelson Reyes  
Principal, John H. Taggart School
