

March 2019

Dear Parents and Families of Woodrow Wilson Middle School,

I am writing to share information about an exciting investment happening in our school.

Our school will receive a \$11,161,426 major renovation. The upgrades include renovating all 65 classrooms and the auditorium. Students will enjoy a new schoolyard and Science & Technology labs.

This is an exciting and welcome safety upgrade for our school. The work will be carried out during the day by BSI Construction, Dolan Mechanical, Herman Goldner and Mulhern Electric Company, Inc. A Project Manager from the School District will be assigned to supervise the contractor to ensure minimal disruption to the school day.

I will notify you when the work is complete. For more information on our project visit our website at www.philasd.org/capitalprograms/programsservices/construction/capital-projects/.

Thank you for your patience, as we continue our mission to provide a safe learning environment for our children.

For questions, please send an e-mail to CapitalPrograms@philasd.org or call 215-400-4730.

Best,

Shawn McGuigan
Principal, Woodrow Wilson Middle School
