April 29, 2019

Dear Comegys Elementary School Community,

As a part of the School District of Philadelphia’s effort to provide students and staff with safe, accessible and appealing drinking water, 33 water outlets at your school were initially tested for lead on January 24, 2019. Of those outlets, 31 outlets produced water that was below the action level of 10 ppb. Two (2) water outlets were found to have results above the water safety threshold and these outlets were immediately shut-off.

Below outlines the confirmed corrective action steps that were taken for those five water outlets that tested above the action limit.

<table>
<thead>
<tr>
<th>Sample Date</th>
<th>Floor</th>
<th>Outlet Number</th>
<th>Outlet Type</th>
<th>Outlet Description</th>
<th>Lead Result (ppb)</th>
<th>MDL (ppb)</th>
<th>PQL (ppb)</th>
<th>Confirmed Corrective Action Description</th>
</tr>
</thead>

<td>Outside RM 104</td>
<td>17.2</td>
<td>0.3</td>
<td>1.0</td>
<td>Replaced with Hydration Station^1</td>
</tr>
</tbody>
</table>

Notes:
- AA = Above Action limit of 10 ppb
- BA = Below Action limit of 10 ppb
- MDL = Method Detection Limit
- PQL = Practical Quantitation Limit
- J = Result estimated below the PQL
- < = not detected above PQL
- ppb = parts per billion

Outlet Types:
- WF=Water Fountain/Bubbler
- HS=Hydration Station/Bottle Filling Station
- FT=Faucet/Tap
- FP - Food Prep/Pot-Filler/Kitchen Kettle
- IM - Ice-Maker

^1 Hydration Station has passed subsequent testing and is turned on for use. Hydration Stations offer filtered water and bottle filling stations that remove, on average, 99.3 percent of lead from drinking water. These filtered water bottle filling stations are more effective, efficient, and affordable than the alternatives to lead remediation.

^2 Indicates a follow-up flush sample result. Standard protocol when retesting AA outlets is to collect a follow-up flush sample.
The School District will test the drinking water at your school every five years and share the results through a letter and also post the results on the District’s website. If you wish to review the results from your school and for more information, you may visit the District’s website at: www.philasd.org/waterresults.

Sincerely,

Francine Locke, MS
Environmental Director
