October 22, 2019

Dear Duckrey Elementary School Community,

As a part of the School District of Philadelphia’s effort to provide students and staff with safe, accessible and appealing drinking water, 46 water outlets at your school were initially tested for lead on June 11, 2019, June 12, 2019, and June 20, 2019. Of those outlets, 39 outlets produced water that was below the action level of 10 ppb. Seven (7) water outlets were found to have results above the water safety threshold and these outlets were immediately shut-off.

Below outlines the confirmed corrective action steps that were taken for those five water outlets that tested above the action limit.

Notes:
AA = Above Action limit of 10 ppb
BA = Below Action limit of 10 ppb
MDL = Method Detection Limit
PQL = Practical Quantitation Limit
J = Result estimated below the PQL
< = not detected above PQL
ppb = parts per billion

Outlet Types:
WF=Water Fountain/Bubbler
HS=Hydration Station/Bottle Filling Station
FT=Faucet/Tap
FP - Food Prep/Pot-Filler/Kitchen Kettle
IM - Ice-Maker

*Denotes an outlet location that has not been in use (the outlet was temporarily turned on for testing).

1 Associated faucet tap was sampled on 09/24/2019. Concentration of lead in this sample was 5.5 ppb, which is below the action limit.

The School District will test the drinking water at your school every five years and share the results through a letter and also post the results on the District’s website. If you wish to review the results from your school and for more information, you may visit the District’s website at: [www.philasd.org/waterresults](http://www.philasd.org/waterresults).

Sincerely,

Brian Joseph
Environmental Director
