May 17, 2022

Dear **Dunbar Elementary School** Community,

As a part of the School District of Philadelphia's effort to provide students and staff with safe, accessible and appealing drinking water, **12** water outlets at your school were initially tested for lead on **March 23, 2022**. Of those outlets, **Eight (8)** outlets produced water that was below the action level of 10 ppb. **Four (4)** water outlets were found to have results above the water safety threshold and these outlets were immediately shut-off.

Below outlines the confirmed corrective action steps that were taken for those **Four (4)** water outlets that tested above the action limit.

Sample Date	Floor	Outlet Number	Outlet Type	Outlet Description	Lead Result (ppb)	PQL (ppb)	Confirmed Corrective Action Description
03/23/2022	00	01	WF	007- row of three, near stairs, right	69	1	Removed from Service
03/23/2022	00	02	WF	007- row of three, near stairs, middle	500	1	Removed from Service
03/23/2022	00	03	WF	007- row of three near stars left	510	1	Removed from Service
03/23/2022	02	08	WF	207- in classroom	69	1	Removed from Service

Notes:

AA = Above Action limit of 10 ppb
BA = Below Action limit of 10 ppb
MDL = Method Detection Limit
PQL = Practical Quantitation Limit
J = Result estimated below the PQL
< = not detected above PQL
ppb = parts per billion

Outlet Types:

WF = Water Fountain/Bubbler
HS = Hydration Station/Bottle Filling Station
FT = Faucet/Tap
FP = Food Prep/Pot-Filler/Kitchen Kettle
IM = Ice-Maker

The School District will test the drinking water at your school every five years and share the results through a letter and also post the results on the District's website. If you wish to review the results from your school and for more information, you may visit the District's website at: www.philasd.org/waterresults.

Sincerely,

Steve Link
