# The School District of Philadelphia in Context: 

 Changes in Statewide PSSA Performance, 2019-2022Molly Schlesinger, Senior Research Associate; Ebru Erdem, Director, Research, Policy, and Practice

## Background

The Pennsylvania System of School Assessment (PSSA) is a standards-based, criterion-referenced test administered to all School District of Philadelphia (SDP) students in grades 3-8 near the end of the school year. All students are assessed in English Language Arts (ELA) and Math, and students in grades 4 and 8 are also assessed in Science. Students score in one of four performance groups depending on how well they did on the assessment: Advanced, Proficient, Basic, and Below Basic. Each year, the Pennsylvania Department of Education (PDE) publicly releases the percentage of students in each school in Pennsylvania who performed in each of the four PSSA performance groups. In 2020, the PSSAs were not administered due to school closures caused by the Covid-19 pandemic. In 2021, the PSSAs were administered to a smaller than usual population, in part due to the continuing challenges of the Covid-19 pandemic, and thus results from 2021 are not considered generalizable. ${ }^{1}$

This research brief highlights the changes in the percentage of students scoring in the Proficient or Advanced performance groups on the PSSA exams from 2019 (the last normal administration of the PSSAs before the Covid-19 pandemic) to 2022 (the most recent PSSA administration, and the first normal administration since the Covid-19 pandemic) in Pennsylvania school districts.

## Data Sources and Methods

All data is publicly available from the Pennsylvania Department of Education (PDE). ${ }^{2}$
School districts ${ }^{3}$ are included in the ELA and Math performance analyses if they had 2,500 or more students take the ELA and Math PSSAs in 2022. For context, about 45,000 School District of Philadelphia students took the ELA and Math PSSAs in 2022. Thus, to be included in these analyses, other Pennsylvania districts needed to have about 5\% or more of the School District of Philadelphia population who took the ELA or Math PSSAs. Out of 656 school districts that participated in the ELA

[^0]and Math PSSAs in 2022, 47 are included in the ELA and Math performance analyses in addition to the School District of Philadelphia. ${ }^{4}$

School districts are included in the Science performance analysis if they had 750 or more students take the Science PSSA in 2022. For context, about 15,000 School District of Philadelphia students took the Science PSSA in 2022. Thus, to be included in this analysis, other Pennsylvania districts needed to have about 5\% or more of the School District of Philadelphia population who took the Science PSSA in 2022. Out of 656 school districts that participated in the Science PSSA in 2022, 55 are included in the Science performance analysis in addition to the School District of Philadelphia.

## English/Language Arts Performance

## The School District of Philadelphia saw a smaller Proficient/Advanced performance decline on the ELA PSSA than 43 other districts from 2019 to 2022, but overall performance rates were lower than 35 districts in 2022.

Statewide, there was a decline in the number of Pennsylvania students participating in the ELA PSSA from $2019(748,347)$ to $2022(698,708)$. There was also a six-point decline in the percentage of students scoring in the Proficient or Advanced performance groups on the ELA PSSA from 2019 (61\%) to 2022 (55\%). ${ }^{5}$
When including only school districts that had 2,500 or more students take the ELA PSSA in 2019 and 2022 (about 17-19\% of the total statewide test-taking population), there were similar declines in participation from $2019(139,011)$ to $2022(115,619)$ compared to the state overall (Table 1). When looking at the performance of just these school districts, there was a six-point decline in the percentage of students performing Proficient or Advanced on the ELA PSSA from 2019 (58\%) to 2022 (52\%). The averages are rather comparable to the statewide Proficient/Advanced performance in 2019 ( $61 \%$ statewide, $58 \%$ included in Table 1) and 2022 ( $55 \%$ statewide, $52 \%$ in Table 1). The performance of students in school districts included in Table 1 is slightly lower in 2022 than the performance statewide in 2022.
The School District of Philadelphia, the largest school district in Pennsylvania, with the greatest number of students taking the ELA PSSA in both years, saw a one-point decline in the percentage of students performing Proficient or Advanced on the ELA PSSA from 2019 (36\%) to 2022 (35\%). This was a smaller percentage point decline than 43 other Pennsylvania school districts with 2,500 or more students who took the ELA PSSA in 2019 and 2022 (Table 1 and Figure 1). However, the percentage of students scoring Proficient/Advanced was seven to 53 percentage points higher in 35 of these school districts than in the School District of Philadelphia. Despite declines in the Proficient/Advanced rate from 2019 to 2022, these 35 school districts still had a higher percentage of students who scored Proficient or Advanced on the ELA PSSA in 2022 than the School District of Philadelphia.

[^1]Table 1. Percentage of students who scored in the Proficient/Advanced performance groups on the ELA PSSA in 2019 and 2022 for Pennsylvania school districts with more than 2,500 ELA PSSA participants

## Math Performance

## The School District of Philadelphia saw a smaller Proficient/Advanced performance decline on the Math PSSA than 40 other districts from 2019 to 2022, but overall performance rates were lower than 35 districts in 2022.

Statewide, there was a decline in the number of Pennsylvania students participating in the Math PSSA from $2019(747,972)$ to $2022(699,265)$. There was also a six-point decline in the percentage of students scoring in the Proficient or Advanced performance groups on the Math PSSA from 2019 (42\%) to 2022 (34\%). ${ }^{6}$

When including only school districts that had 2,500 students take the Math PSSA in 2019 and 2022 (about $32 \%$ of the total statewide test-taking population), there were similar declines in participation from $2019(241,704)$ and $2022(223,794)$ compared to the state overall (Table 2). When looking at the performance of just these school districts, there was a seven-point decline in the percentage of students performing Proficient or Advanced on the Math PSSA from 2019 (40\%) to 2022 (33\%). The averages are rather comparable to the statewide Proficient/Advanced performance in 2019 ( $42 \%$ statewide, $40 \%$ included in Table 2) and 2022 ( $34 \%$ statewide, $33 \%$ in Table 2).
The School District of Philadelphia, the largest school district in Pennsylvania, with the greatest number of students taking the Math PSSA in both years, saw a five-point decline in the percentage of students performing Proficient or Advanced on the Math PSSA from 2019 (21\%) to 2022 (16\%). This was a smaller percentage point decline than 40 other Pennsylvania school districts with 2,500 or more students who took the Math PSSA in 2019 and 2022 (Table 2 and Figure 2). However, the percentage of students scoring Proficient/Advanced was five to 58 percentage points higher in 35 of these school districts than in the School District of Philadelphia in 2022. Despite declines in the Proficient/Advanced rate from 2019 to 2022, these 35 school districts still had a higher percentage of students who scored Proficient or Advanced on the Math PSSA in 2022 than the School District of Philadelphia.

[^2]Table 2. Percentage of students who scored in the Proficient/Advanced performance groups on the Math PSSA in 2019 and 2022 for Pennsylvania school districts with more than 2,500 Math PSSA participants

| School District | \# of students |  | \% Prof/Adv |  | Difference \% Prof/ Adv 2019 to 2022 |

## Science Performance

The School District of Philadelphia saw a smaller Proficient/Advanced performance decline on the Science PSSA than 43 other districts from 2019 to 2022, but overall performance rates were lower than 48 districts in 2022.

Statewide, there was a decline in the number of Pennsylvania students participating in the Science PSSA from $2019(245,747)$ to $2022(232,909)$. There was also a six-point decline in the percentage of students scoring in the Proficient or Advanced groups on the Science PSSA from 2019 (68\%) to 2022 (62\%). ${ }^{7}$

When including only school districts that had 750 students or more take the Science PSSA in 2019 and 2022 (about $35 \%$ of the total statewide test-taking population), there were larger declines in participation from $2019(86,275)$ to $2022(80,766)$ compared to the state overall (Table 3). When looking at the performance of just these school districts, there was a six-point decline in the percentage of students performing Proficient or Advanced on the Science PSSA from 2019 (65\%) to 2022 (59\%).
The School District of Philadelphia, the largest school district in Pennsylvania, with the highest number of students taking the Science PSSA in both years, experienced a three-point decline in the percentage of students performing Proficient or Advanced on the Science PSSA from 2019 (41\%) to 2022 (38\%). This was a smaller percentage point decline than 43 other Pennsylvania school districts with 750 or more students who took the Science PSSA in 2019 and 2022 (Table 3 and Figure 3). However, the percentage of students scoring Proficient/Advanced was five to 52 percentage points higher in 48 of these school districts than in the School District of Philadelphia. Despite declines in the Proficient/Advanced rate from 2019 to 2022, these 48 school districts still had a higher percentage of students who scored Proficient or Advanced on the Science PSSA in 2022 than the School District of Philadelphia.

[^4]Table 3. Change in percentage of students who scored in the Proficient/Advanced performance groups on the Science PSSA in 2019 and 2022 for Pennsylvania school districts with more than 750 Science PSSA participants

Source: 2022 PSSA School Level Data (Excel) and 2022 PSSA School Level Data (Excel), accessed 12/8/22 Note: This is the same data in the Difference \% Prof/Adv 2019 to 2022 column of Table 3. The different bar length for the same percentage labels on the bars are due to rounding.

## Summary of Results

Statewide, there was a decline in the number of students taking the ELA, Math, and Science PSSA exams from 2019 to 2022. There was also an average decline across the state in the percentage of students performing in the Proficient or Advanced performance groups on the three PSSA exams.

Among school districts that had more than or equal to 5\% of the number of School District of Philadelphia test-takers participate in the ELA, Math, and Science PSSA exams in 2022, there were similar declines in the numbers of students participating and performing Proficient or Advanced on the three exams during the two years analyzed.

The School District of Philadelphia saw smaller declines in Proficient/Advanced performance rates from 2019 to 2022 than 40-43 other school districts in these analyses on the ELA, Math, and Science PSSA exams. For all exams, however, between 35-48 of the other school districts had Proficient/Advanced performance rates five to 58 percentage points higher than the School District of Philadelphia. Thus, while the School District of Philadelphia experienced less severe declines from 2019 to 2022 than other districts, its 2022 performance was still below those districts.

## Appendix A: All Pennsylvania School Districts

The majority of Pennsylvania school districts across the state, regardless of the number of test takers, saw a 5-9\% or 10-14\% decline in Proficient/Advanced performance on the ELA, Math, and Science PSSAs from 2019 to 2022 (Figure A1). This includes 366 school districts for ELA, 417 school districts for Math, and 327 school districts for Science.

Additionally, 56 school districts saw a $15-19 \%$ or $20-24 \%$ decline in Proficient/Advanced performance on the ELA PSSA, while 67 districts saw these same declines for Math, and 60 districts experienced them for Science. When looking at districts with declines of $25 \%$ or more in Proficient/Advance performance from 2019-2022, 11 school districts saw such a decline for ELA, seven districts for Math, and 11 districts for Science.

Some school districts experienced no change or a minimal change of $+/-4 \%$ or less in the number of students who scored in the Proficient/Advanced performance groups on the ELA, Math, and Science PSSAs from 2019 to 2022. This includes 208 school districts for ELA, 153 school districts for Math, and 225 school districts for Science.

A small number of school districts saw a 5-9\% or 10-14\% increase in Proficient/Advanced performance on the ELA, Math, and Science PSSAs from 2019 to 2022. This includes 10 school districts for ELA, eight school districts for Math, and 22 school districts for Science. Finally, three school districts experienced an increase of 20\% or more in Proficient/Advanced performance on the Science PSSA from 2019 to 2022.

Figure A1. Numbers of school districts by percentage point change in Proficient/Advanced performance on the ELA, Math, and Science PSSAs from 2019 to 2022 for all Pennsylvania school districts with valid data for both years

Source: 2022 PSSA School Level Data and 2022 PSSA School Level Data, downloaded 12/8/22
Note: 6 school districts were excluded from the ELA PSSA, 6 school districts were excluded from the Math PSSA, and 8 schools were excluded from the Science PSSA due to limited or missing data. Changes were calculated by subtracting the percent of students who scored Proficient and Advanced in each school district between 2019 and 2022.

    ${ }^{2}$ Data is located: https://www.education.pa.gov/DataAndReporting/Assessments/Pages/PSSA-Results.aspx
    ${ }^{3}$ For the purposes of this analyses, school districts were determined based on the District Name column in the PSSA files provided by PDE. Because of business rules excluding school districts with fewer than 2,000 ELA or Math PSSA participants, this analysis only includes large, public, school districts in Pennsylvania, and excludes charter or alternative schools.

[^1]:    ${ }^{4}$ Based on the business rules in the PSSA files publicly available from PDE, school districts can be made up of a single charter school or community school.
