Administrative Procedures for Youth Suicide Awareness and Prevention
(Attachment for Policy No. 253 and consistent with Act 71)

Purpose

The Board of Education (“Board”) is committed to maintaining a safe and welcoming environment in all School District of Philadelphia (“District”) schools and acknowledges the impact of suicide on students’ physical and mental health, academic performance, and ability to participate in activities that provide a well-rounded education. Suicide impacts students, families, and the entire school community. Therefore, the purpose of these Administrative Procedures is to promote the health, safety and welfare of students’ development and to safeguard against the threat, attempt, or death by suicide among students, and to provide support in such events.

These Administrative Procedures shall describe procedures for several different activities along the continuum of suicide prevention in the District. These activities include the following:

a) To provide protocol if a student expresses suicidal thoughts or intention of self-harm on District property, at any District-sponsored activity, on any District vehicle providing transportation to or from a school or District-sponsored activity;

b) To provide school procedures following a student’s suicide threat or attempt that does not occur on District property or during a District sponsored activity, but that is reported to any District personnel;

c) To provide protocol for acute crisis response immediately after (e.g., same or next day) a student has died by suicide;

d) To provide postvention protocol and activities to help the school community recover after a suicide event (the weeks following a suicide event);

e) To provide re-entry protocol for a student following hospitalization for suicidal ideation or suicide attempt;

f) To provide at least 4 hours of gatekeeper training to all educators across the District every five years, fulfilling Act 71 mandate;

g) To provide additional professional development in risk assessment, elevated risk factors, and crisis intervention for school counselors, school social workers, and psychologists;

h) To provide protocol for parental information notification and involvement; and

i) To provide student awareness education.

Procedures

These Administrative Procedures shall apply in any situation where a student is expressing suicidal ideation or threats, including verbal or physical behaviors, on school property, at any school-sponsored activity, or on any public vehicle providing transportation to or from a school, or portal to portal, or school-sponsored activity. These Administrative Procedures shall also apply following a suicide threat or attempt that does not occur on school grounds or during a school-sponsored activity, but that is reported to any school personnel. In conformity with Pennsylvania Law, the District has developed resources and protocols for the following situations and requirements:
a) Protocol if a student expresses suicidal thoughts or intention of self-harm on District property, at any District-sponsored activity, on any District vehicle providing transportation to or from a school or District-sponsored activity:
   i) The District’s protocol in this respect can be found at the following [LINK].
   ii) Other than linked above, the Department of Transportation Services will follow normal incident protocols for student expressions of suicidal thoughts or intentions of self-harm on District transportation.

b) Protocol following a student’s suicide threat or attempt that does not occur on District property or during a District sponsored activity, but that is reported to any District personnel:
   i) The District’s protocol in this respect can be found at the following [LINK].

c) Protocol for acute crisis response immediately after (e.g., same or next day) a student has died by suicide:
   i) The District’s protocol in this respect can be found at the following [LINK].

d) Protocol and activities to help the school community recover after a suicide event (the weeks following a suicide event):
   i) The District’s protocol in this respect can be found at the following [LINK].

e) Protocol for a student following hospitalization for suicidal ideation or suicide attempt:
   i) The District’s protocol in this respect can be found at the following [LINK].

f) Protocol for at least 4 hours of gatekeeper training to all educators across the District every five years, fulfilling Act 71 mandate:
   i) The District provides an hour of training on Cornerstone annually to all staff and requires certain school staff to complete the same. The list of staff that completed the training will be stored and maintained in Cornerstone. The list will be reviewed by the Office of Prevention and Intervention for compliance. On a regular basis, the training materials will be reviewed for quality and applicability to the District setting.

h) Provide additional professional development in risk assessment, elevated risk factors, and crisis intervention for school counselors, school social workers, and psychologists:
   i) The District offers various professional development opportunities in risk assessment, etc. throughout each year.

h) Provide protocol for parental information notification and involvement:
   i) The District’s protocol in this respect can be found at the following [LINK].

i) Student Awareness Education:
   i) The District is implementing the evidence-based Signs of Suicide (SOS) program to provide suicide awareness education to students, staff, and families. SOS teaches students how to identify signs of depression and suicide within themselves and friends. Additional mental support is available during and after this training for students. Additionally, the program provides training for parents, community, and school staff, in addition to their yearly training, that focuses on teaching them to recognize at-risk students and what next steps to take to support that youth.

**Maintenance Schedule**
These Administrative Procedures shall be reviewed upon review of the Policy, or upon the occurrence of a triggering event.
