

## Building On Our Progress: Building Improvement Updates

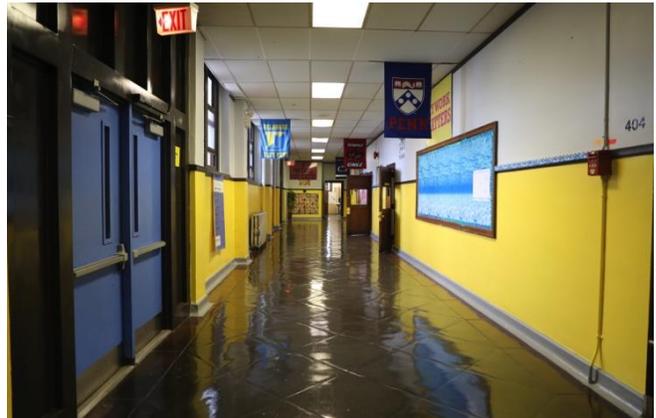

### Modernized Classrooms Support Early Literacy

Students are back and enjoying over 160 new classrooms across 11 schools that support student learning and achievement in innovative ways. The improvements were part of a \$20 million investment that included desks, chairs and seating options better suited for students' age groups; improved lighting; new paint, cabinets, and closets; and technology to support small-group instruction. ## District Maintenance Painters and Contractors Ensure Healthy, Inviting, and Safe Spaces for Students to Learn

Nearly 100 District Maintenance painters and contractors repaired over 22,000 square feet of damaged paint and plaster before the start of school. Work will continue at 38 schools throughout the school year to ensure the safety of students and staff. School buildings will be inspected daily and if paint dust and debris are found, a certified HEPA vacuum will be used to remove them. Learn more about paint and plaster stabilization by [clicking here](#).
